RECENT PROJECTS

Jeeb: Grocery Service
Hishopper
Noogah
TottLabs
Pick & Ride
Jik vik
Taskmario: Book Home Services

Jeeb Technologies , Qatar — *Senior Software Engineer*

March 2023- Present

Planning, Developing and managing web, mobile app & enterprise applications. Based on performance, I am granted with the extra responsibility as technical lead of backend development too.

Role — *Senior Software Engineer*

March 2023- Present

- Main responsibilities
  - Collaborate with cross-functional teams to design and architect scalable and reliable backend systems.
  - Ensure the alignment of the backend architecture with overall project goals and requirements.
  - Lead and actively participate in the development of backend components and services
  - Write clean, maintainable, and efficient code in languages such as Java, Python, or other relevant backend technologies.
  - Design and implement APIs to facilitate communication between the frontend and backend systems.
  - Ensure API endpoints are well-documented, secure, and optimized for performance.
  - Collaborate with frontend engineers, mobile developers, and other stakeholders to integrate backend services seamlessly.
  - Provide technical leadership and mentorship to junior backend engineers.
  - Work closely with QA teams to ensure the reliability and correctness of backend functionality.

Boost (Creative Marketing Agency), Qatar — *Senior Software Engineer*

October 2021 - March 2023

- Worked on Web, mobile applications & enterprise applications
- Successfully delivered mobile & web applications i.e 2- huge & proud products
  - Vehicle Inspection System
  - Quality Control System
  - Pick & Ride (Dockless bicycles)

WebCastle Technologies LLC, Dubai UAE — *Software Engineer*

August 2019 - September 2021

- As a Backend developer delivered in
  - Design and architect scalable, modular, and maintainable PHP applications.
  - Evaluate and select appropriate PHP frameworks and libraries based on project requirements.
  - Collaboration with the clients
  - Write clean, efficient, and secure PHP code.
  - Proficient in using PHP frameworks such as Laravel, CodeIgniter, or others as per project requirements.

Datacube Software Solutions, India — *Software Engineer*

January 2018 - January 2019

- As a seasoned Backend Developer, I have a track record of successfully delivering top trending applications that have garnered widespread acclaim and user adoption
- Main activities
  - Writing client-side JavaScript code to implement dynamic and interactive features on web pages, such as form validation, asynchronous requests, and event handling.
  - Consuming backend APIs in the frontend code to fetch and display data dynamically.
  - Amazon EC2 (Elastic Compute Cloud): Provisioning and managing virtual servers to host backend applications.
  - Amazon S3 (Simple Storage Service): Storing and retrieving data, including static
  - Engaging in full-stack development, which includes both frontend (HTML, CSS, JavaScript) and backend (server-side code) development tasks.
  - Collaborating with frontend developers to seamlessly integrate server-side logic with user interfaces, ensuring a cohesive and responsive user experience.
  - Using AJAX (Asynchronous JavaScript) or Fetch API to make asynchronous requests to the server and update the UI without requiring a page reload.

Spectrum Softtech Solution, Kochi, India — *Web Developer Intern*

May2017- January2018

- Worked as an internee on online E-Commerce application.

SKILLS

Industrial Experience

Mobile Apps/Web development, PHP, Laravel, CodeIgniter, JavaScript, Ajax, JQuery,HTML,CSS
JSON/XML parsing, Client/Server communication. Git Source Control , 3rd party frameworks & library integration.
.

Academic Experience

C/C++,C#.NET, VB.NET, Java,Databases, Oracle 10g(basics), MySQL,JavaScript,PHP,
Computer hardware and Assembly language.

EDUCATION

University of Engineering & Technology, Bangalore.Bachelor of Computer Applications

May2011 - June- 2015

CGPA : 3.20/4.00

LANGUAGES

English, Hindi, Malayalam, Tamil

.
